```

Discovery bulk
GSE111782
9 symptomatic / 9 asymptomatic
Affymetrix microarray

Independent heterogeneous
replication bulk
GSE311535
6 symptomatic / 6 asymptomatic
RNA-seq, diabetes-specific

Single-cell localization
GSE260657
8 symptomatic / 7 asymptomatic
Smart-seq2 sample files

ports were analyzed separately and were not pooled. The single-cell layer supports localization and specificity review only, not mechanistic support for the bulk correlation.
